SUMMARY

Results-driven Application Support Engineer with expertise in SQL, incident management, and backend debugging within live production environments. Experienced in collaborating with Product teams to analyse defects, prioritise enhancements, and improve system reliability. Strong foundation in web technologies and data analysis with exposure to AI data workflows.

WORKING EXPERIENCE

Application Support Engineer

Aug 2025 – Present | Gurgaon, Haryana

People Strong , Gurgaon

- Managed and resolved **300+ monthly production support tickets** with 95–98% SLA adherence, ensuring high application availability and client satisfaction.
- Reduced average resolution time by **30%** through structured root cause analysis, SQL-driven backend investigation, and efficient incident handling.
- Performed incident trend analysis to identify recurring system defects, contributing to a **25% reduction in repeat production issues**.
- Collaborated with Product and Engineering teams to communicate defects and enhancement requests using data-backed insights, supporting prioritization and faster releases.
- Provided enterprise-level support for **payroll processing, role-based access control (RBAC), and MIS/report generation**, ensuring data accuracy, compliance, and smooth client operations.

Jr. Gen AI Intern – AI Projects

May 2025 – Jul 2025 | Pune, Maharashtra

Qualitas Global Services LLP, Pune

- Prepared and structured labelled datasets to support computer vision model training pipelines.
- Conducted data validation and quality audits to ensure annotation accuracy across large datasets.
- Collaborated with AI engineers to resolve dataset inconsistencies, improving model training reliability.

TECHNICAL SKILLS

Web Technologies:

- HTML, CSS, **React.js**, **Next.js**

Programming & Databases :

- SQL (Joins, Subqueries, Aggregations, Data Validation)
- JavaScript
- Java
- Python

Development Tools & Version Control:

- Git, GitHub, VS Code,

Soft Skill

- Analytical Problem Solving, Detail-Oriented Execution
- Requirement Analysis & Documentation, Analytical Thinking

Data Visualization & BI Tools:

Power BI, Microsoft Excel, Power Query

Core Skills:

Object-Oriented Programming (**OOPS**)

Production & Product Skills :

- Root Cause Analysis
- Production Support & Incident Management
- SLA Monitoring

Tools & Platforms:

- Git & GitHub
- VS Code
- Power BI
- Microsoft Excel & Power Query

EDUCATION

Master of Computer Science and application (MCA)

Pimpri Chinchwad University

Aug 2023 – May 2025 | Pune, Maharashtra

Bachelor of Computer Science and application(BCA)

Jiwaji University, Gwalior

Jul 2020 – Jul 2023 | Gwalior, MP

PROJECTS

Hospital Management Dashboard (Power BI)

Tools: Power BI Desktop, MySQL, Python, Excel, Figma

- Developed a multi-dashboard analytics system to support hospital operations, finance, staffing, and patient care.
- Built dashboards for doctors, patients, staff, finance, and hospital overview using Power BI for real-time insights.

Reflect – A Journal Web App (Full stack Web app)

Tech Stack: Next.js, Tailwind CSS, Shadcn UI, Supabase

- Engineered a full-stack journal web application using Next.js, Tailwind CSS, and Shadcn UI.

- Implemented secure user authentication and real-time data handling using Clerk and Supabase.
